- **Areas of Interest:** Development and Applied AI .

ACADEMIC PROJECTS

Explainable AI-Powered Smart Crop Recommendation System

- Built and deployed an end-to-end ML-based crop recommendation system using 7 soil and climate parameters, benchmarking 5 models and achieving 99.32% accuracy with Random Forest, delivering top-3 predictions with risk alerts and NPK-based fertilizer guidance.
- Integrated Explainable AI (LIME) and developed a full-stack Flask web application with user authentication and SQLite, providing yield & revenue estimation, crop rotation insights, and a personalized crop lifecycle plan.

AI-Powered Legal Document Generator

- Automated the creation of formal Indian legal complaints using Gemini AI and ChromaDB.
- Implemented semantic search for IPC sections and generated court-ready PDFs, reducing document preparation time from hours to minutes.

COURSE WORK

- Computer Software - Basic operating system concepts - **Database Operations.**
- Overview of **OOPS CONCEPTS** and **Data Structures & Algorithms.**
- Polymorphism and I/O operations.
- Project management- Plans, methods, and methodologies- **Categorizing software**

CERTIFICATIONS

- **Programming Essential in Python– CISCO NETWORK ACADEMY** - Certificated for completion of programming Essential in Python.
- **MongoDB Database Adminstration Certificate:** Earned certification demonstrating expertise in MongoDB installation.

EXTRACURRICULARS

- Attending Google summits and TED talks.
- Participating in coding Hackathons.
- Solving problems in Leetcode , Geeks For Geeks and other coding Platforms.
- Acquiring Knowledge through new certifications.
